

### **Marmalade Dream Rose**

*Rosa 'Marmalade Dream'*

Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4a

Group/Class: Shrub Rose

#### **Description:**

This outstanding shrub rose presents beautiful mildly fragrant, dark peach colored blooms with yellow centers; consistent blooming throughout the season above dark green glossy foliage; a classic look and fragrance along walkways and in the garden setting

#### **Ornamental Features**

Marmalade Dream Rose is bathed in stunning lightly-scented double peach flowers with lemon yellow eyes at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

#### **Landscape Attributes**

Marmalade Dream Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

2901 ST. MARY'S ROAD - WINNIPEG, MANITOBA - R2N 4A6 - (204) 255-7353

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Marmalade Dream Rose is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

#### **Planting & Growing**

Marmalade Dream Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
